

# We recognize the National Career Readiness Certificate, which *you* can earn.

**BE JOB-READY  
WITH YOUR SKILLS**

You can earn a Bronze, Silver, or Gold National Career Readiness Certificate that helps us match your skills to our jobs. We both benefit when you are matched to a job that fits your skills. You know that you are prepared for the job and so do we.

Your high school diploma, community college degree, or college degree tells us that you have fulfilled the requirements of classroom learning experiences. The National Career Readiness Certificate measures your real world skills that are used in nearly every job – Reading for Information, Applied Mathematics, and Locating Information.

It's easy to take the WorkKeys assessments to earn your certificate. It takes about three hours of time and a short wait for your results. Then you'll be ready to apply for employment with our company.

For more information on how to earn a National Career Readiness Certificate, call or visit one of the following locations:
